

Ionic S.P.A

The ionic spa is a non-invasive foot-bath treatment that accelerates the release of toxins from the body. The ionic spa only takes 15 minutes compared to other units that take 30 minutes. Negative and positive ions can quickly activate and release acidity, inflammation, and toxins from your body as the soles of your feet are so porous. A series of 10 treatments are suggested for mild to moderate health conditions and anyone living in a major urban center, such as LA, because of the petroleum particulates in the air. Anyone with autoimmune disease, multiple chemical sensitivity, a chronic condition, or cancer will find it more cost effective to buy a unit so you can do 2-3 sessions a week for 3 months, then reduce to once a week. Please note the units I sell do not change the water drastic colors as most of the color change is from the ionic process and not solely from your toxins. These units are easier to clean after treatment and there is no difference in its effectiveness.

What the Ionic Spa Can do for You

- Detoxification of the Entire Body
- Heavy Metals and Inflammation Removed
- Increases Energy
- Increases Oxygen in the Body
- Helps Pain Relief
- Improves Sleep
- Reduces Unwanted Fluid Retention
- Headache Relief
